EXAMINER

VO, HUYEN X

ART UNIT PAPER NUMBER

2655

DATE MAILED: 03/02/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/817,830

Applicant(s)

SHARMA ET AL.

Examiner

Huyen X. Vo

Art Unit

2655

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1,2,4,5,10-12,14,15,20-22,25-27,29,30 and 35 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-2, 4-5, 10-12, 14-15, 20-22, 25-27, 29-30, and 35 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 26 March 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed 12/13/2005, have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Murveit et al. (US 6766295).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, 4-5, 11-12, 14-15, 21-22, 26-27, and 29-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Murveit et al. (US 6766295).

4. Regarding claims 1 and 21, Murveit et al. disclose an apparatus and system, comprising: a server to couple to a client device having speech recognition functionality (*figure 2, client device 150 and server 100*); and an acoustic model adaptor locatable at the server to adapt an acoustic model specifically for a user of the client device (*figure 3, element 212, and/or col. 4, lines 24-67*); and wherein, when there is a network

Art Unit: 2655

connection between the client device and the server (*figure 2*), the server and client device together implement a single user speech recognition system in which digitized raw speech data of a user or extracted speech feature data of user is received by the server from the client device and the acoustic model adaptor adapts a user-specific acoustic model for the client device based solely on the digitized raw speech data of the user or the extracted speech feature data of the user and the server stores the adapted user-specific acoustic model for use only by the associated client device and user in application utilizing speech recognition (*col. 3, line 53 to col. 4, line 67, using received speech data to adapted existing speech recognition models for that particular user so that to enhance speech recognition accuracy*).

5. Regarding claims 11 and 26, Murveit et al. disclose a method and machine-readable medium, comprising: storing a copy of an acoustic model for a user of a client device at a server, the client device having speech recognition functionality (*elements 216 and 216 in figure 2 and or referring to col. 5, lines 7-67*); receiving speech data from the client device (*figure 2*); and adapting the acoustic model specifically for a user of the client device (*figure 3, element 212, and/or col. 4, lines 24-67*); and wherein, when there is a network connection between the client device and the server (*figure 2*), the server and client device together implement a single user speech recognition system in which digitized raw speech data of a user or extracted speech feature data of user is received by the server from the client device and the acoustic model adaptor adapts a user-specific acoustic model for the client device based solely on the digitized raw speech

data of the user or the extracted speech feature data of the user and the server stores the adapted user-specific acoustic model for use only by the associated client device and user in application utilizing speech recognition (*col. 3, line 53 to col. 4, line 67, using received speech data to adapted existing speech recognition models for that particular user so that to enhance speech recognition accuracy*).

6. Regarding claims 2, 12, 22, and 27, Murveit et al. further disclose that the client device is a mobile computing device (*col. 3, lines 27-35*).

7. Regarding claims 4, 14, and 29, Murveit et al. further disclose that the client device includes local memory to store digitized raw speech data (*buffer memory and physical memory are inherently included in any mobile phone system for storing input speech data for processing and transmitting*).

8. Regarding claims 5, 15, and 30, Murveit et al. further disclose that the client device includes local memory to store extracted speech feature data (*buffer memory and physical memory are inherently included in any mobile phone system for storing input speech data/features for processing or transmitting*).

### ***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2655

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 10, 20, 25, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murveit et al. (US 6766295) in view of Kanevsky et al. (US 6442519).

11. Regarding claims 10, 20, 25, and 35, Murveit et al. fails to disclose that the client device downloads and stores the user-specific adapted acoustic model. However, Kanevsky et al. teach that the client device downloads and stores the user-specific adapted acoustic model (*col. 7, lines 19-40, upon user's request, modified acoustic models are transmitted to other sites on the network*).

Since Murveit et al. and Kanevsky et al. are analogous art because they are from the same field of endeavors, it would have been obvious to one of ordinary skill in the art at the time of invention to modify Murveit et al. by incorporating the teaching of Kanevsky et al. in order to enable systems on the network to recognize speech with good accuracy.

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huyen X. Vo whose telephone number is 571-272-7631. The examiner can normally be reached on M-F, 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on 571-272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
